

*Dear Readers,*

Welcome to Vol. 2 No. 2 issue! This edition includes:

- a country paper;
- a commentary;
- original research papers; and
- a review paper

The writers are from Bangladesh, Cayman Islands, Hong Kong, India, Saudi Arabia, Singapore, Thailand, UK and USA.

This is another dimension to keep us up-to-date in the field of medical education. We appreciate that we have numerous papers from many regions. Because of this interest we will continue to pursue a better standard. We have recruited more peer reviewers from our region. Most of them are on the SEARAME Executive Committee and are distinguished medical educationists. We wish to give recognition to the original journal:

*Journal of Medical Education of Thailand* that was created by The Consortium of Thai Medical Schools.

Our journal will continue to engage in excellence so that it will be of international standard. We also wish that our readers will continue to contribute to our journal and promote it to those who are working and are interested in this field.

We invite you to share your experience and knowledge so that it will brighten and broaden those in the field of medical education both locally and internationally. It will also make our field more noteworthy and receive recognition. Last but not least, your contribution will not only be beneficial in your country but will be a valuable part in helping others in medical education.

*Nantana Sirisup*
